

ARCHITECTURAL INTEGRAL LED PENDANTS

ARCHITECTURAL PENDANTS

JESCO LIGHTING is pleased to bring you our newest aluminum die-cast Architectural Pendant now with an integral high output COB LED. Precision engineered with the most technically advanced components, this unique system provides the architect, lighting designer or interior designer the ability to customize the form and function of a pendant for modern high-end residential and commercial interiors to provide a consistent lighting design throughout a space.

Available in four sizes ranging from a residential 6"- to a commercial 16"-diameter, the Pendants can be hung via a rigid rod or suspended by aircraft cables. Select from three types of shades: Pressed Glass Refractor, Cased Glass Diffuser, each available in various vivid colors, or an Aluminum Reflector. Complete the look with accessories such as glass lenses, lens inserts and aluminum hoods.

The Architectural Pendants allow perfect visual integration in ceilings; high output LEDs offer smooth 0-10V dimming control and effective performance to meet any specific application needs. Its customizability creates signature looks and bold visual statements for modern architectural interiors – an exceptional lighting solution for residential, commercial, retail and institutional applications.

ONLINE CONFIGURATORSM

The online JESCO ConfiguratorSM is a simple-to-use, step-by-step design guide. The program, found on our website, takes the architect or designer through the entire design process, from selection of the fixture's shade diameter, method of hanging, shade selection, and finally, accessories.

Once the desired fixture is built, a rendering of the customized fixture, along with a bill of material that includes ordering information and product specifications will be generated. The information can be printed or emailed from our website: <https://goo.gl/3quQAY>
