Jesco Lighting Introduces Reflective Waves Of Matchsticks

New Product Introduction: Aire Series 505 —ambient/accent interior ceiling lighting in reflective waves of matchstick-like forms.

Design: Jesco In-House Lighting Design & Engineering Team.

Manufacturer: Jesco Lighting, Inc., “the future of lighting.”

Product Application: Aire Series 505 fixtures embody an original contemporary design that provides functional ambient/accent light, in a range of models for upscale residential, commercial, institutional and retail interiors. These include reception spaces, corporate dining areas, executive offices; healthcare and hospitality venues; and throughout fine residences.

Product Description: Aire Series 505 offers four models of close-to-the-ceiling light fixtures, one that doubles as an ADA-compliant wall sconce.

Set against square chrome-plated mounting bases, two models offer either eight or twelve chromed “matchsticks,” in wavelike forms that criss-cross one over the other. The matchsticks have low-watt halogen lights at each end, in flame-like shapes.

A sixteen-light ceiling model offers a round mounting base that conceals an electrical junction box mounted below ceiling grade, suspending the sixteen matchsticks from a chrome 10-inch stem.

A six-light ceiling or wall model has a deco-style chromed mounting plate with concave edges. When used as a sconce, the six-light model meets Americans with Disabilities Act requirements for a less than four-inch projection from walls.

Jesco Debuts Aire Series 505... page 2

Construction & Finishes: Aire Series 505 is made from chrome-plated steel mounting plates and "matchsticks." Each matchstick has a 12-volt 10-watt halogen light at each end. Behind each mounting plate is a built-in electronic low-voltage transformer.

All Aire Series 505 models are UL and CUL listed.
