## New Jesco “Condensed Catalog” Details Monorail Low-Voltage, Quick-Adapt Track Lighting And Companion Wall Sconces

*Glendale, New York, 2007* — Jesco Lighting, Inc. is a fast-growing manufacturer offering a comprehensive selection of contemporary architectural, energy-efficient lighting fixtures for a broad range of commercial, institutional and residential applications. The company has announced availability of a Condensed Catalog detailing the entire Monorail system of contemporary, low-voltage, flexible track lighting with companion wall sconces.

The full-color, 24-page Condensed Catalog presents a thorough overview of the Monorail system, including its ingenious foundation element, the Quick-Adapt universal fixture-head mounting jack; the wide array of decorative pendant-style fixture options that are offered; and light accessories such as companion Jesco wall sconces. A table of contents page allows users to easily find what they are looking for, by product category.

The Condensed Catalog uses actual application and product photos, schematic illustrations and descriptive information. It presents Monorail as a durable, changeable alternative to traditional, more obtrusive, inflexible track systems with more limited light options.

The catalog also details Quick-Adapt, a snap-and-twist fastening device that quickly, easily allows users to create a range of flowing, adjustable, fixture-head and pendant lighting designs. Remainder of the catalog is dedicated to covering 45 contemporary fixtures and options that can be specified to produce a range of subtle to dramatic lighting effects.
