FOR USE UPON RECEIPT — 2008

Introducing The Orfeo Collection: Quick Adapt Low-Voltage Pendants From Jesco Lighting

New Product Introduction: The Orfeo Collection — colorful, eye-catching collection of original contemporary-design glass pendants, in an array of shapes and sizes.

Design: Noted industrial designer Orfeo Quagliata, in conjunction with the Jesco In-House Lighting Design and Engineering Team.

Manufacturer: Jesco Lighting, Inc.

Product Applications: The Orfeo Collection provides combination nonglare ambient direct and diffused accent illumination, within colorful pendant light designs. Each model works across a range of decorative interior applications. These include building lobbies; conference and meeting spaces; corporate dining rooms and executive suites; corridors; healthcare waiting rooms; hospitality venues; reception rooms; and upscale residential interiors.

Product Description: The Orfeo Collection pendants are characterized by individually hand-colored glass lighting designs, with aesthetical continuity. The pendants are unique at any time, but especially come to life when illuminated. The glass is hand blown, slumped or “phuzed,” some with boiled cubes, cylinders or glass tops.

The mid-scale curved, smooth-edged glass shades fill with diffused light and radiate it with a subtle, colored or white iridescence. Polished metal suspension rods, and

coordinating domed canopies at the ceiling tops, contribute to the overall aesthetic. Curved Monorail track is a second mounting option. Pendants each employ a single xenon low-voltage bi-pin 50-watt lamp.

Construction & Finishes: Orfeo Collection pendants are constructed of hand-blown glass shades, with aluminum fittings in satin nickel and chrome finishes. All models are designed to meet UL, CUL and CE standards of operation.
