

FOR USE UPON RECEIPT — 2011

## SPOT THE DIFFERENCE, WITH NEW LED TRACK SPOT LIGHTS FROM JESCO

**New Product Introduction: Quick Adapt LED Spot Lights** — *instantly* connectable, adjustable LED white-light units for use on JESCO Monorail suspended, curved track and Monopoint surface-mount systems.

**Design:** JESCO Lighting design and engineering team.

**Manufacturer:** JESCO Lighting Group, founded 1998.

**Product Applications: Quick Adapt LED Spot Lights** provide a wide range of energy-conserving very low-watt, longlife LED units in an instant, for use on Monorail low-voltage track lighting or Monopoint direct ceiling systems from JESCO. Converting from less efficient, more energy-consuming, shorter life halogen or incandescent trackheads to LEDs was never so time-, energy- and money-saving.

Typical installations include restaurants; hotel and building lobbies; casinos; professional office facilities; merchandise showrooms; up-market retail boutiques; museums and galleries; and residential applications.

**Product Description: Quick Adapt LED Spot Lights** offer 14 cylindrical, disc and square LED decorative lighthouse shapes. Each connects in seconds anywhere along JESCO Monorail bendable, ceiling-suspended low-voltage track, or direct ceiling Monopoint mountings.

Once in place, **Quick Adapt LED Spot Lights** are secure, yet the Monorail connector allows them to move along the track at will; to change spacings; to pair or

group different units; and otherwise “quickly adapt” to desired spatial or interior changes below the light.

**Construction & Finishes:** **Quick Adapt LED Spot Lights** are on satin nickel finishes, matching Monorail or Monopoint extruded aluminum or satin-nickel finishes. Rails can be field cut and bent for custom flexibility to any installation. Conducting and non-conducting connectors in straight, T-, X- and bendable shapes allow multiple or continuous rail sections to connect in limitless configurations. Single or dual lighthouse fittings are machined components that can be spaced or grouped at will, changed in minutes.
