

FOR USE UPON RECEIPT — 2011

MAKE INSTANT, CHANGEABLE DESIGN STATEMENTS WITH NEW LED PENDANT LIGHTS FROM JESCO

New Product Introduction: Quick Adapt LED Pendant Lights — instantly connectable decorative LED light units for use with JESCO Monorail suspended, curved ceiling track lighting and Monopoint surface-mount lighting.

Design: JESCO Lighting design and engineering team.

Manufacturer: JESCO Lighting Group, founded 1998.

Product Applications: Quick Adapt LED Pendant Lights provide a wide range of energy-conserving, longlife LED units that instantly, attach to JESCO Monorail low-voltage track lighting or Monopoint ceiling-mounts. Converting from less energy-efficient halogen or incandescent trackheads or pendants to LEDs has never been so time-, money- and energy-saving.

Typical installations include restaurants, hotel and building lobbies; casinos; professional office facilities; merchandise showrooms; up-market retail boutiques; museums and galleries; and residential applications.

Product Description: Quick Adapt LED Pendant Lights offer *ten* cylindrical and disc LED lighthouse shapes in contemporary designs, of varying scale. They can be mixed and matched, spaced at easily changeable intervals, grouped at different heights and aimed in different directions. Each connects in seconds anywhere along JESCO Monorail curved, ceiling-suspended low-voltage track or individually mounted on JESCO junction-box Monopoints.

JESCO Quick Adapt LED Pendant Lights ... page 2

Once in place, **Quick Adapt LED Pendant Lights** are secure. Monorail connectors allow them to move along the track at will to change spacings, pair or group different units, and otherwise “quickly adapt” to desired lighting and three-dimensional design changes below the light. Monopoint lights can augment Monorail units in any space, for lighting and design continuity.

Construction & Finishes: **Quick Adapt LED Pendant Lights** are cylindrical and round pendants. Monorail and Monopoint are extruded aluminum. **Quick Adapt** *Ana*, *Diego* and *Evan* cylinders have dichroic glass tips. *Carlos* model has a decorative frosted acrylic disc. *Castel* and *Chico* models are minimalist small-scale cylindrical designs. Three round disc pendants have decorative accent points. *Avalon* and *Timothy* have suspended larger disc-shaped diffusers. *Morgan* has acrylic edging with single interchangeable acrylic discs in blue, green, orange or red.

Rails can be field cut and bent for custom flexibility to each installation. Conducting and non-conducting connectors in straight, T-, X- and bendable shapes allow multiple or continuous rail sections to connect in limitless configurations. Suspended cable lengths are eight feet, field cuttable with socket assemblies, hang-straight tubes, integral LED arrays and drivers provided.
