BACK-LIT MIRRORS

Envisage Back-Lit Mirrors are available in two energy-conserving choices: LED or T5 linear fluorescent light sources. Both provide abundant white light at very low wattage with long maintenance-free operating lives.

Mirrors are manufactured with a copper-free process which provides excellent resistance to humidity and corrosion.

Special diffusion and glazing of the glass makes light output more effective, optimizing viewer comfort. Light placement behind the mirror provides ease of cleaning and eliminates damage typical to exposed light sources.

The visually appealing geometric designs of these mirrors add value to any interior décor. The mirrors also provide high functionality, flattering visual clarity and make a lasting design statement.

APPLICATIONS

- Restrooms in restaurants, bars, hotels, guest rooms, locker rooms.
- Bathrooms in hospitals, assisted living and long-term care facilities.
- Lobbies and corridors in hotels, office buildings, restaurants.
- Fitting rooms in clothing stores, tailors, dressmakers.
- Bathrooms, walk-in closets, entries, corridors, bedrooms, living rooms in fine residences.
