

FOR USE UPON RECEIPT — 2018

JESCO's Patented INFINA ACX: Highly Flexible, AC LED Linear Strips Provide Unlimited Solutions for Myriad Indoor, Damp, and Outdoor, Wet Applications

- **New Slim 9/16" Profile for Tighter Spaces**
- **Color Choices of 3000K, 4000K, new Red and Blue**
- **Factory made custom lengths to 100' in either 12" or 19.5" increments**

Product Overview: Plug **INFINA™ ACX** into a single outlet and control it with a remote switch to provide neutral white, warm white, or *new* blue or red lighting for unlimited outdoor, wet and damp as well as indoor applications. Operating directly from ordinary 120 line voltage, **INFINA ACX** requires no *LED drivers or additional power sources*. **INFINA™** is an endlessly adaptable, low-profile, high-lumen linear LED lighting system.

Design: JESCO Lighting Group design and engineering team. Line voltage power system by Mag-LED.

Manufacturer: JESCO Lighting Group, a U.S. company, founded 1998.

Product Applications: **INFINA™ ACX** produces exceptionally white or colored LED lighting for a wide-range of creative indoor, damp and outdoor, wet installations including retail, hospitality, commercial, and institutional, as well as upscale residential.

INFINA™ ACX can be easily concealed in and along doors and windows; natural or manmade outdoor/indoor coves and toe kicks, eaves, decks, gazebos; building

staircases, aisles, ramps; along railings and columns; other perimeters and architectural elements. Anywhere low-scale, easily adaptable *dimnable* and flexible architectural LED lighting is sought.

Product Description: As with each **INFINA™** design, **ACX** operates directly from standard 120 line voltage. A *single* electric plug-in outlet powers a continuous run of up to 100 feet. A hardwire version is also available by request. In-line or remote LED drivers are not required. By being driverless, the weakest part of the LED system has been eliminated – guaranteeing a long life. **INFINA™ ACX** can mount either in a snap-in 3' channel or with mounting clips in dry, damp and wet locations.

JESCO's distinctive, constant-voltage, driverless AC LED technology with LEDs embedded within a patent-pending flexible, optically clear thermoplastic jacket provides 50,000 hours or more of operation; with 70% or greater lumen maintenance.

INFINA™ ACX has a maximum run length of 100 feet in increments of 12 inches. JESCO LEDs employ genuine 3-step MacAdam LEDs for consistent light-color generation and output. **INFINA ACX** in 3000K and 4000K produces *354 to 380 lumens* from just 4.5-watts per foot; with efficacy of 78.6 to 84.4 lumens per watt. **ACX Blue** produces 90 lumens from 2.13 watts per foot with 42.3 lumens per watt; **ACX Red** produces 180 lumens from 2.13 watts per foot with 84.5 lumens per watt; all have a CRI of 80+. **INFINA™ ACX** is c-ETL-us rated for interior and exterior plug-in applications. Dimmable with an electronic low-voltage dimmer.

The entire run is factory prepared to the desired specifications and shipped to the job site for quick and easy installation.

A full line of LED accessories, cables, and connectors are available to meet design requirements for any installation. **INFINA™ ACX** has a 5-year factory warranty.

Construction & Finishes: **INFINA™ ACX** is constructed from durable high-temperature, flexible, optically-clear thermoplastic polyurethane (TPU) and is 9/16" Wide x 5/16" High.
